

Week 9 guidance

Welcome to the first week of the last summer term. Some of you may have returned to school, some of you may be thinking about it and some of you may have chosen not to come back. Wherever you are, we hope you are safe and well. Remember all the staff are thinking about you.

As always you can contact us through our class email and remember you do not have to print out sheets of stuff but view it on the screen and use your exercise books.

Maths

This week we will be thinking about different mathematical skills we use and focusing in on some of them. For example when we investigate, we use skills such as: being systematic, trying different possibilities, seeking different ways to achieve an answer and trial and improvement. Each day, the activity is designed to promote one of these skills.

Remember to practice your times tables on Timestable Rock Stars. The log in is your LGFL username and your password is also your LGFL username.

English

This week is a revision of some of what we have done on grammar and reading. There are power points to support learning and guide you through.

Science

<https://switchzoo.com/zoo.html>

We have been thinking about evolution and how animals evolve to adapt to their surroundings. Play the game above. Then choose a climate and design the perfect animal that could live in it. What features would they have? Draw and label your new creation.

Votes for schools

Go to the Keston website, distant learning and votes for schools. Here you will find a new topic to debate, discuss and explore. It is a perfect opportunity to sit down with the family and have a debate. Let us know your thoughts.

P.E

Please see guidance on the website.

Music

Go to <https://charanga.com/site/log-in/> and log in as a student.

To log in: Username: firstname,surname followed by kps.

Password: your class name. shakespeare or dickens. Eg: johnsmithkpsShakespeare.

Mrs Woods has set a music lesson up for you to complete, this will be changed weekly.
