

Year 2—Marvellous Medicine Key vocabulary

Vocabulary / Key Terms

Scutari	A name of a place in Turkey where the Crimean War took place.
Crimean War	A conflict fought from October 1853 to February 1856.
Royal Red Cross	A military award given to nurses in wars.
British Hotel	The hospital set up by Mary Seacole in the Crimean War.
Prejudice	An opinion based on somebody's background.
Soldiers	A person who serves in the army.

Important People

Mary Seacole

Mary Seacole was born in Jamaica and took over a hospital there. Mary travelled to the Crimea and at the 'British Hotel' hospital she cared for and treated injured soldiers. Mary suffered lots of racial prejudice and was treated very differently because of the colour of her skin.

Florence Nightingale

In 1845, when Florence was 35 years old, she decided that she wanted to be a nurse. In 1853 the Crimean War began and Florence travelled to Scutari to help the injured soldiers. She was known as the 'lady of the lamp' as she would continue to care for people throughout the night.

Important Facts

Mary Seacole was born in 1805 in Jamaica, Mary's mother was Jamaican and her father was a Scottish soldier.

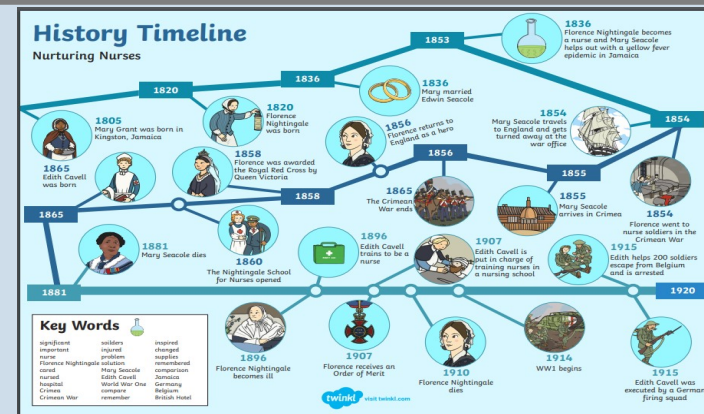

Mary travelled to the Crimea and at the 'British Hotel' she cared for and treated injured soldiers.

Mary travelled to England and wanted to help with the work Florence Nightingale had started but was turned away.

In 1853, Florence became a superintendent at a women's medical centre in London. In the same year, the Crimean war began.

In 1854, Florence travelled to Scutari in Turkey in order to help the injured soldiers. She worked hard to clean the hospitals and save the lives of the injured soldiers.

Non-Living	A matter that is not alive.
Organism	An individual animal or plant.

Important Facts

The human life cycle shows the different stages of a humans life from a baby to becoming elderly.

When a baby is born there are many things they are unable to do like sitting up on their own, going to the toilet on their own and feeding themselves.

Babies need lots of help and need to be cared for, adults have to provide them with somewhere to sleep, with clothes and with food and milk.

Humans and animals all have basic needs to survive and grow, such as the need for food, water and air.

When you eat a balance diet, your body obtains the fuel and nutrients it needs to function properly.

An average meal should be made up of one-third carbohydrates and one-third fruit and vegetables, with the remaining one-third split between dairy, protein and a little bit of fat.

All living things must move, respire, be sensitive, need nutrition, excrete, reproduce and grow in order to be considered alive.
